

Jiffy Pots landscaping

Landscaping is all about beautifying and energizing communities. But now, more than ever, we must all work together to ensure the sustainability of those communities for years to come. One key way can be achieved is by commitment to reduce plastic usage from the whole value chain, from growers to landscapers and architects to municipalities.

Jiffy Pots Original can help meet this challenge. Our tried-and-tested favorite is the eco-friendly alternative to plastic. Made from fully compostable materials and certified for organic production, it does contribute significantly to (plastic) waste reduction.

An additional benefit to you, there is no need to de-pot when you use Jiffy Pots. Simply plant the container straight into the ground still on the plant – the roots will grow through its walls and it breaks down into the soil. This offers two additional main advantages: no transplant shock and over 25% reduction in planting-out time and labour.

This is why you want to work with Jiffy Pots

- 
STRONGER ROOTS
- 
BIODEGRADABLE
- 
SUSTAINABLE

Nurseries

- Optimum root growth allows all your plants to thrive and grow strong.
- There's no transplanting for your young plants as they are re-planted in their compostable post, allowing quicker establishment.
- Plants in Jiffy Pots need less irrigation, reducing your water usage, water bills and fertilizer usage.

Landscape architects and contractors

- Jiffy Pots Original are made from fully compostable, biodegradable materials.
- With no need to remove the pots at planting it can save you 25-30% on your planting out labour and time, and no plastic pots to collect and dispose of afterwards either.
- Jiffy Pots are 100% plastic free, offering a perfect, simple and cost effective solution for businesses wanting to reduce their plastic use and waste.

- 
INNOVATIVE
- 
SAVING TIME
- 
ZERO PLASTIC

- 
PARTNERSHIP
- 
SOLUTION DRIVEN
- 
SUSTAINABLE

Municipalities

- Jiffy Pots help you build a more sustainable value chain and greener communities.
- Fully biodegradable Jiffy Pots can play a key part in meeting your targets to eliminate single-use plastics.
- Jiffy Pots Original stimulate air pruning of the roots. The plant produces more fine roots. Fine rooting stimulates the plant ability to find water and brings drought resistance to the plant.

Let's work together

Jiffy is the leading global supplier of growing media using renewable resources and bio-based materials. We aim to serve you, our customers in plant propagation and cultivation, to achieve better results. We can do this together by continually improving, innovating and working towards our common goals based on facts, teamwork and involvement. Let's develop sustainable plant growing solutions together: starting today!
