

# Jiffy Preforma plugs: Efficient and flexible propagation solutions

Propagation plugs for all

Developing sustainable plant  
growing solutions together

# Jiffy Preforma plugs propagation solutions

## Preforma: for all propagators

Propagation is easier with Preforma plugs, whether you're using seed, cuttings, or tissue culture. The plugs are specially designed to hold their shape. With excellent aeration, water-holding, and drainage, every time. Preforma provides excellent yields of healthy, usable plants. Growers in horticulture, forestry, and nursery sectors trust Preforma to cultivate healthy roots from the start, ensuring the growth of superior plants.

## Efficient and economical

Whether you rely on manual labor or automation, Preforma adapts to your crops and growing solutions. Our ready-to-use trays of tailored plugs provide significant cost and labor savings. Experience faster turnaround times, maximize bench space efficiency and minimize losses. With Preforma, you can choose pre-filled trays over the labor-intensive task of filling them yourself. Save on expenses, including media, trays, labor, and storage.

## Why choose Jiffy Preforma plugs

- More usable and uniform plants per tray.
- Better management and use of water and nutrients. Helping to reduce cost.
- Up front labor savings along with less time to finish equals production cost saving.
- Reduced phytosanitary issues.
- Preforma is made in our own certified locations, and we control the entire supply chain, from raw materials, through tray production and delivery.

## Did you know?

Preforma works with all automated systems

☆☆☆  
Creates super quality for finished plants

●●●  
Excellent aeration, water-holding, drainage

Helps to reduce the use of water and nutrients

Compatible with most irrigation systems

Preforma offers superior premium products tailored for your next stage, be it hanging baskets, pots, growbags, growblocks, NFT gutter systems, and beyond

# Most frequently asked questions

- 1. What is Preforma exactly?**  
Preforma Plant plug = a mix of a substrate + binder + tray, which gives a high porosity plant plug.
- 2. What makes Preforma unique?**  
A uniformly high-quality plug, crafted from a custom blend of coir or peat, caters to the specific needs of growers.
- 3. What advantages does a Preforma offer over loose fill mix?**
  - 20% faster sticking: speed up your planting process.
  - More usable and uniform plants per tray.
  - Labor savings: the product comes ready-to-use, eliminating prep time and focusing solely on sticking.
- 4. Does the Preforma plug hold and release water easily?**  
Given their inherent porosity and volume, the plugs absorb and release moisture in a controlled manner. It's essential to manage watering based on the blend you choose.
- 5. Do you have special substrate for special crops?**  
Yes, we offer unique Preforma variants to provide the best solutions for your needs.
- 6. Can you use Preforma plant plugs only for cutting propagation?**  
Preforma isn't limited to cutting propagation. It's also ideal for sticking cuttings, germinating seeds, and transplanting tissue cultures (TC).
- 7. Is Preforma only used in ornamentals?**  
Preforma is used in the whole range of different purposes: ornamentals, vegetables, forestry, nursery stock, and more.
- 8. Can you make a special Preforma plug for our crop?**  
The blends are developed to address individual customer needs and specific production requirements.
- 9. Can you fill all types of trays?**  
Due to the fact that Preforma production starts as a liquid, we can fill 97% of most commercially available trays.
- 10. Is Preforma suitable for automation?**  
Because the plug is bonded and uniform in shape and quality, the Preforma plug can be managed manually as well as by most grading or transplanting machines.

Our broad portfolio offers you an incredible variety of options to create tailor-made solutions for your business. We are always willing to listen to you, our customers, to help us all technically improve in order to feed and beautify the world while caring for the environment.

# Jiffy Preforma options

Ready-to-use plugs in a wide choice of industry trays.

A limited number of trays are available for the 'plug-to-plug' option, designed to enhance productivity and timing.

We offer a variety of blend options and features related to plug pH, rewetting and drainage. We can tailor the perfect blend to meet any grower's requirements. Consult with your Preforma specialist to explore all available options.
